

Date
26.03.2026**Declaration of compliance
Bisphenol A (BPA, CAS-Nr. 80-05-7)1**

Linnemann GmbH hereby confirms that all products within its scope of delivery and services have been assessed with regard to Bisphenol A (BPA, CAS No. 80-05-7).

Based on the evaluations carried out, available supplier information and the currently applicable regulatory requirements, it is confirmed that the products comply with the provisions of the European Union. This includes in particular:

- the requirements of the REACH Regulation (EC) No 1907/2006, including the information obligations concerning Substances of Very High Concern (SVHC) pursuant to Article 33,
- the relevant restrictions under REACH Annex XVII, where applicable, and
- the requirements for materials and articles intended to come into contact with food pursuant to Regulation (EU) No 10/2011 as amended by Regulation (EU) 2024/3190.

Our stainless steel products typically do not contain Bisphenol A, as this substance is not used in metal processing production.

For products intended for food contact, it is ensured that Bisphenol A is not intentionally used in the manufacturing process and that the strict requirements of Regulation (EU) 2024/3190 (including the applicable detection limits) are met.

The assessment is based on the currently available information from the supply chain as well as on the currently valid legal requirements. LINNEMANN GmbH continuously monitors regulatory developments and will take appropriate measures if necessary to ensure ongoing compliance.
