Packaging and Packaging Waste Regulation (PPWR) – Regulation (EU) 2025/40**

Linnemann GmbH takes its responsibility for a sustainable circular economy very seriously.

The PPWR only affects the transport and protective packaging (e.g. cartons, protective films, pallets and strapping) that we use when placing our products on the EU market.

Our position and measures:

- We are already registered under the German Packaging Act (VerpackG) (registration number: DE4681766215792) and fulfil all obligations, including quantity reporting and the provision of take-back and recovery options for B2B packaging.
- The PPWR (Regulation (EU) 2025/40) entered into force on 11 February 2025 and will apply uniformly across the entire EU from 12 August 2026. It replaces the previous Packaging Directive 94/62/EC and sets higher requirements for recyclability, minimisation of packaging waste, design for recycling and labelling.
- We continuously optimise our packaging processes to fully meet the future requirements regarding recyclability, material minimisation and harmonised labelling.

As soon as the final implementing provisions and harmonised standards are published, further information will be available here.

For further information or specific enquiries regarding our packaging materials, please do not hesitate to contact us at any time.
