

Extension of the tube connection and high grade steel fittings product range for the 30th anniversary

In 2011 Linnemann GmbH in Tübingen announces the addition of various materials and sizes to the product range to celebrate their 30th anniversary. The supplier of tube connections and high grade steel fittings presents its new programme in the Internet shop in addition to the company information: www.linnemann-online.com

In 1981 the „Systemtechnik Linnemann“ is launched among other things with its patented quick clamping ring for flange connections in high vacuum engineering. In 1989 the company expands and company headquarters move to Tübingen. In 1992 „Linnemann GmbH Rohrverbindungen und Edelstahlaraturen“ is founded with international orientation. In 2004 the siblings Annette, Martin and Thomas Linnemann take over the company management.

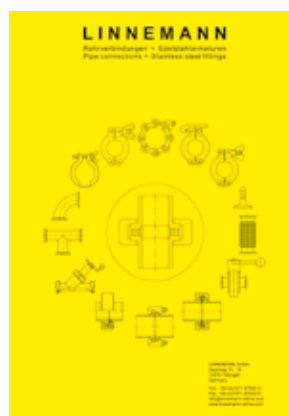

„Reliable components for reliable process technology“. This underlines the claim as a supplier of high quality tube connection systems, fittings and special products. The QM system that has been certified since 1996 confirms the philosophy of consistent quality improvement. Linnemann serves on committees such as DIN for the standardisation and further development of tube connection systems.

Their program includes more than 12,000 standardised and self-developed articles for tube connections of high grade steel, glass and special materials as well as seals of different elastomers and plastics.

The products of Linnemann GmbH are used in process plants of the chemical, pharmaceutical and cosmetics industry, in bio-technology and medical technology, in the food and beverages industry as well as in high vacuum engineering, cryotechnology and filter and water processing technology. The media are gaseous, liquid, pastes or bulk materials. www.linnemann-online.com

KF small flange connection systems are available in different material versions and combinations as well as with different clamping rings.

The latest catalogue contains the new materials and dimensions. They can also be found in the online shop under www.linnemann-online.com
